INCLINED CONVEYORS & TURNTABLES

ADM PACKAGING TECHNOLOGY offers a range of standard inclined conveyors and turn tables to meet the needs for end of line handling of bagged products. These pack off units are specially designed to collect and transfer bagged products from most **VERTICAL FORM FILL AND SEAL MACHINES**.

An emphasis on broken bags that spill across the floor creating a hazard for employees has been factored into the design to transferring all products up the conveyor and to be collected off the turntable.
