

ADM Conveyor Feeder

Product Feeder Conveyor

The product feeder is best suited to convey difficult to flow dry and moist foods to be packaged. Where a vibratory feeder lacks momentum the feeder conveyor has a positive drive belt that draws and stirs the lower layer inside the hopper freeing the product to be conveyed. The belt used is a high friction groove style FDA approve belt and a proven performer for even the most stubborn products. The food grade Stainless steel construction provides the safest protection for food and the industry.

Features

- Feeding stubborn food and non food products.
- Stainless steel construction
- Variable speed drive option
- Product stirrer option
- Adjustable opening hatch
- Safety interlocks
- Designed to AS4024
- Easy access for cleaning
- Custom built to suit

Model	ADM-PFC3
Type	Product Feeder Conveyor (Belt Conveyor)
Conveyor Size	Custom made to suit
Speed	10m/min (Variable speed option)
Hopper size	50L-200L
Power supply	240V 50Hz 0.18kW-0.75kW
