

# MICE 2019- Visitors and Exhibitors,

Thankyou for visiting ADM Packaging Automation at stand 137A. It was an honor to speak with you and discuss your application. We had many interests from roasters and company executives wanting to Automate their packaging line, innovate and revolutionize their process in this successful market. We built a world class Australian machine that will offer an advantage for our customers to compete, grow and add capital value to their business. The ADM-DP31 Premade Quad-seal box bottom bag demonstrated at the show proved to be a highlight for many customers. We demonstrated it for three days successfully using polyester and craft paper coffee bags. Developed locally and at world standard. Please feel free to contact or visit us for a live demonstrations and trials using your bags.

For more information about what we presented please see web links and attached photos below.
