Subject: ADM NEWS and HIGHLIGHTS From FOODPRO 2023

Thursday, September 14, 2023

Dear Valued Customer

FoodPro 2023 – Wow, it was a huge come back.

ADM Packaging Automation was a proud exhibitor at FoodPro 2023 in Melbourne. It was a great turnout for visitors seeking solutions for food processing applications. The smaller number of stands with packaging solutions also enjoyed regular visitors seeking packaging equipment. Being one of the fewer packaging stands, we enjoyed discussions with visitors from newly startup businesses through to multinationals. The quality of visitors was the highlight and the interest in our equipment was strong. Some question form visitors included

"*You were on my list as one of the go to stands while in Melbourne this week*."
"I'm a new user and operate from home, what can you suggest for me".
"*We have a major international contract coming up and in desperate need to replace failing equipment*".
"*As a consultant for the processing industry, can we contact you if we have a need to pack".*

We spoke to a lot of the exhibitors representing local and international companies and say this is one of the strongest shows yet coming out of Covid. It's been a long time following past show cancellations that had created a void in the industry. The visitors come to see what new ideas are out and what improvements there are to adapt to. At ADM we felt it important to get out there early and put our best foot forward with our range of equipment from startup right up to all the high-speed, high-tech packaging lines.

Of the three machines exhibited on our stand, two were manufactured here in Australia at our Melbourne factory. What sets us apart from our competitors is the knowledge we've gained over the years working with local manufacturers and understanding their requirement. This has helped us to develop Automation systems to suit local needs. We also work with international suppliers to provide complete turnkey solutions.

"At ADM where quality, reliability and support is just around the corner".

From all of us ad ADM we thank you for your support over the years. I look forward to the opportunity to work with you. For support, feel free to call us on 03 94848791 or email me your inquiry to george@admpa.com.au.
